

Call for Papers: Your participation is required!

The RAMS/LCC expert conference is established as a platform for the exchange of practical experiences and therefore thrives on the specialist contributions of its participants.

If you would like to give a presentation at the 2024 conference, we ask you to submit your topic suggestion, stating the speakers, the topic and a short summary (500 characters) by email to veranstaltungen@rail-s.de not later than April 26, 2024.

The length of the lecture should not exceed 30 minutes including discussion. All selected speakers receive free entry on both days of the event and for the evening event.

We will gladly answer your questions.

The expert conference is aimed at:

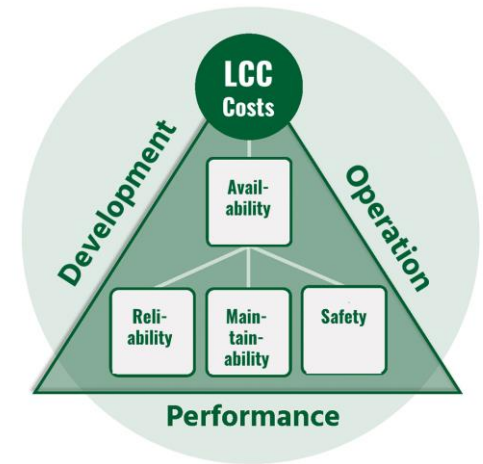

- Managers, decision-makers, experts from all areas of the company
- RAMS/LCC specialists
- Newcomers to RAMS and LCC technology

We expect Speakers and participants from many industries, including:

- Vehicle producers and operators (rail, road, air)
- Construction companies, equipment suppliers and operators of infrastructure facilities
- Supply industry
- Service companies
- Consulting and certification companies
- Scientists from universities and technical colleges
- Manufacturers and operators in the renewable energy sector

Key content areas include:

- Presentation of new processes and tools
- Imparting project experiences
- Requirements, problems and methods of information provision, determination of characteristic values, evaluation of results and optimization
- RAMS and LCC within the product development process
- Tips and tricks for using process models and software tools
- Potential of reliability-oriented maintenance (RCM) and operational management
- Current developments in relevant standards and recommendations for their implementation
- Discussion of cost/benefit considerations for analyses and methods

CALL FOR PAPERS

7th RAMS/LCC EXPERT CONFERENCE 2024

**November, 14 - 15
in Dresden, Germany**

**Let's develop
Reliability, Safety and Costs Efficiency
together!**

Organizer:

Rail.S e. V.
Kramergasse 4
01067 Dresden

7th RAMS/LCC Expert Conference

Ladies and Gentlemen

The quality and competitiveness of products and services are increasingly determined by reliability and costs. RAMS/LCC technology as a future-oriented management methodology offers a wide range of options for optimizing products and processes.

The basis for the success of work in this area is not only experience, but also the willingness to engage in ongoing training and the exchange of experiences.

With this event we therefore want to offer you a broad platform for a fruitful, cross-industry exchange of experiences. After the great response to the first six events, the seventh edition of the RAMS/LCC expert conference launched by IZP Dresden mbH will be held jointly by IZP and Rail.S e. V. organized.

The two-day workshop offers a wide range of opportunities and impulses to expand and refresh knowledge and skills as well as for comprehensive discussions with like-minded experts.

In addition to the specialist lectures, there will be sufficient time to answer specific questions from the participants.

An evening event is planned in a quiet Dresden ambience to get to know each other personally and to make contact.

We are at your disposal for any questions.
